

# Singer® SL 7 Class Extra Heavy Duty Sewing Machine

Available exclusively from  
**Strider~Resource**

**The Singer® SL 7 Class Extra Heavy Duty Sewing Machine** with High Lift and Reverse boasts a 3/4 Horse Power WMC Brand Motor, significantly improving longevity and durability over the industry standard light duty 1/2 HP Motor.

The Machines are fully inspected, including the take up screw holes and lifting presser bar screw holes. They are then completely stripped and thoroughly rebuilt with new Timing Cams, Balance Wheel, Shuttles, Races, Top Cam Shafts, Hardened Needle Bars, 3/4 HP WMC Motor, and Paint.

Custom built brackets hold the 7-33 Singer® Head onto a 2" thick table. The heavier table helps to stabilize the machine and is specifically fit to match the pull length of the reverse mechanism.

3/4" Lift	7/8" Sewing Capacity
Extra Large Bobbin	1-1/4" diameter x 1-3/4" length
Accepts 6 Chord	Up to size 546 Nylon Thread
Power Supply	110V, Single Phase, 60 HTz
Dimensions	5' long x 3' wide x 4' high
Weight	367 lbs. Uncrated
