

# Smart™ Swager available with Swager Guarding™

Available exclusively from  
**Strider~Resource**

**Swager Guarding™** allows trained operators to swage wire rope slings without risk of injury caused by pinch points. New and innovative technology permits a full range of wire rope diameters to move freely within the swaging zone. The system automatically stops when the operator gets too close, and easily resets to continue swaging.

**The Smart™ Swager** incorporates a universal die pocket to accommodate both One Press® and multi-press dies which are quickly and easily installed using a modern reliable eccentric clamping system. The pump and motor are fully enclosed and insulated. The swager operates at a very low noise level of 60-68 decibels. The main controls and the electric foot pedal can be repositioned for easy accessibility.

The control system counts and records the total number of swages and operational hours. It records overloads and provides maintenance alerts. Alarms indicate if the oil level is low and if the oil and filter needs to be changed.

Stroke limiter and hold modes are easily programmed to save time and energy.

|                        |                       |
|------------------------|-----------------------|
| Max. Pressure Capacity | 660 Tonnes / 600 Tons |
| Max. Piston Stroke     | 60 mm                 |
| Unloaded Stroke Speed  | 9.5 mm/second         |
| Power Supply           | 220V, 3phase, 60HTz   |
| Dimensions L*W*H (mm)  | 2,065 x 910 x 1,940   |
| Weight                 | 2,600 kg / 5,732 lb   |

## The One Press® Swaging System

*The fastest and most reliable method of swaging Flemish eye wire rope slings and assemblies in the world. Swage Carbon Steel Sleeves from 1/4" up to 1-1/2" in just One Press®!*

US Patents #5,816,094 & #6,032,338  
Canadian Patent #2,172,267
